

THE DEPRESSION Hope CENTER

A resourceful Web site for the depression community...

"Depression had made me withdraw from my friends and family, focus less on my work and goals, and stop doing the things I enjoyed the most. Now, I am focused and back to doing the things I love. I can handle my high stress job better and I am back to doing things with friends again."

- Kristi

THE DEPRESSION *Hope* CENTER

The Depression Hope Center was created as an online community to unite individuals and their loved ones battling depression.

Through this site, we hope to create a resource for those who have been effectively treated and for those seeking depression treatment hope.

"Depression destroyed any relationship that I had. My life became unbearable in my 50's. I now have a job, which I love and I can be around people and enjoy myself without pretending anymore."

-Brenda

These quotes describe patient experiences with NeuroStar TMS Therapy® and do not necessarily represent expected patient results as determined from NeuroStar clinical trials.

NeuroStar TMS Therapy is indicated for the treatment of Major Depressive Disorder in adult patients who have failed to receive satisfactory improvement from prior antidepressant medication in the current episode.

In an NIMH-funded, independent, randomized controlled trial, patients treated with TMS using the NeuroStar TMS System were four times more likely to achieve remission compared to patients receiving sham treatment ($P = 0.0173$, odds ratio = 4.05).¹

NeuroStar TMS Therapy is available by prescription only and may not work for everyone. Discuss with your doctor if TMS Therapy may be the right choice for you.
