Sexual Problems in Men

URL of this page: http://www.nlm.nih.gov/medlineplus/sexualproblemsinmen.html

Many men, especially as they age, have sexual problems. These can include

- Erectile dysfunction
- Reduced or lost interest in sex
- Problems with ejaculation
- Failure of the testicles to make the normal amount of male sex hormones

Stress, illness, medications, or emotional problems may also be factors. Talking frankly with your partner and your doctor about sexual problems is the first step towards restoring sexual health.
